

## My Commitment to the Woodlawn Innovation Network

**As an educator in the Woodlawn Innovation Network I am committed to** learn, grow and embrace innovation in my professional practice.

- ☒ I believe each and every student in our school can learn, grow and achieve amazing things.
- ☒ I will come to work every day committed to KTECH:
  - Knowing our students better.
  - Trusting our students more.
  - Empowering our students in authentic ways.
  - Connecting our students in meaningful ways.
  - Honoring all students in varied systems of recognition and reward.
- ☒ I will approach my work with a design thinking mindset: think big, start small, grow fast.
- ☒ I will collaborate with colleagues to align learning experiences across the content areas and develop rigorous, inquiry-based units, lesson plans and performance assessments
- ☒ I will work side-by-side with local partners to develop and implement rigorous, inquiry-based, real-world learning opportunities for every student, every day.
- ☒ I will work collaboratively with colleagues at my school to use data to differentiate and personalize the learning process for each student in our team, including, but not limited to, one-on-one, small group and blended learning experiences;
- ☒ I am committed to learning to use time and resources in new and more effective ways to personalize learning and ensure each student reaches his/her personal growth targets.
- ☒ I will use a wide range of technologies to expand my own practice and to support student learning;
- ☒ I will fully participate in the system of professional development, mentoring, coaching and other supports provided by WIN.

I understand the district and my supervisor are as committed to support me as learn, grow and innovate.
