What is a Chromebook? A Chromebook is different from a traditional laptop. Chromebooks use Google’s operating system, Chrome OS, instead of using the Windows or macOS operating systems. These machines are designed to be used primarily while connected to the Internet, with most applications and documents living in the “cloud.”

Why Chromebooks for K-2 Students?
- Instant On
- No Software Updates
- No Viruses
- Light Weight, but Durable
- Touch Screen
- It is a Laptop and Converts to a Tablet
- Available Apps
- Integrated with Google tools

Getting Started

Prior to use, charge your device for **2 hours**...You will need to charge your device every night...This helps maintain the battery life...

1. Turn the device on

2. A. You must connect to a WiFi source before signing on

3. B. Click on the WiFi icon

4. C. Click on the WiFi icon to list the available Networks

5. D. Select the correct Network and enter the password if one is required
Now that you are connected to the WiFi...It is time to sign on to the Chromebook...Once you sign on, the student’s profile will be saved on the device...

Click on the Add Person icon

Enter the student’s S#@bhm.k12.al.us...For example, if the student’s number is S77448, then the student’s sign in is S77448@bhm.k12.al.us

Click on the Next icon to enter the password

The password is Stud3nt3

Congratulations...You have successfully signed in to the Chromebook...Click on the Google Chrome icon to begin...

Reporting Stolen or Lost Devices
If the device is stolen, contact the police to file a report...Inform the district so that the device can be disabled and become useless...If the device is lost, report it to the district...
