BIRMINGHAM CITY SCHOOLS
BUILDING LEADERS. IMPACTING THE WORLD.

What is a Chromebook? A Chromebook is different from a traditional laptop. Chromebooks use Google's operating system, Chrome OS, instead of using the Windows or macOS operating systems. These machines are designed to be used primarily while connected to the Internet, with most applications and documents living in the "cloud."

Why Chromebooks for K-2 Students?

- Instant On
- No Software Updates
- No Viruses
- Light Weight, but Durable
- Touch Screen
- It is a Laptop and Converts to a Tablet
- Available Apps
- Integrated with Google tools
